Summary

I'm a Software Engineer with 3 years of experience in Fullstack positions. `React, C#, SQL Server/MySQL`. I have experience in the development of Content Management Systems and ERP applications. I'm looking for backend/system roles.

Experience

Web Developer | DPR Construction | 2021 - present [2 year] | Remote
`Javascript/ES6, React, C#, Web APIs with .Net Core and Entity Framework, SQL Server, Git, Reactstrap, Material UI (MUI), Formik, Chrome DevTools, ActiveBatch`

- *Human Resource Planning Management System:* Developed and did maintenance for 30 modules. This application is used by 50+ HR.
- *Management System for SMS:* Developed generic components and the modules for watching the pending SMS, and SMS sent. We developed the first version in 6 months.
- *Asset Management System:* The system keep tracks of the asset leasing. Developed 8 modules and did mentorship to a new colleague.
- Coordinated the migration of 409 plans/jobs from different technologies to ActiveBatch. The effort lasted 9 months and involved 7 engineers from different teams.

Fullstack Web Developer | GHAPPS | 2019 - 2020 [1 year 8 months] | Colima, Mexico
`HTML5, CSS, Javascript/ES6, JQuery, PHP, MySQL, Git, Bootstrap, AdminLTE`

- Collaborated in the development of a Content Management System. It provides information for Loro Fan, the mobile app of the University of Colima soccer team. Developed the database, the login, UI views, and the backend. The app has 100 downloads for Android.

Freelance Web Developer | 2020 - present [+2 years] | Remote
`Wordpress, HTML5, CSS, Javascript/ES6, JQuery, PHP, MySQL, FTP`

- Designed, developed, deployed, and maintained a website for a company. My client increased their web presence by 100%.
